NON-FUNGIBLE TOKEN

WHITE PAPER

INTRODUCTION

"You can sell anything digital using NFT. Virtual Mavs gear, sneakers, art, pictures, videos, experiences, anything our imagination can come up with."

—Mark Cuban on NFTs

White Dragon is a BEP-20, is a decentralized cryptocurrency IDO platform based on the Binance smart chain (BSC), a sovereign blockchain. White Dragon is designed as a high-performance Dapp and ultra-fast trading platform. Non-fungible tokens (NFTs) are unique, non-interchangeable assets, minted on-chain. These tokens can be linked to anything from digital WDG to physical assets. The core attributes of NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary. We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectables. WDG is a widely known NFT platform where users can collect common, rare, epic, legendary NFT's. The underlying token for each White Dragon encodes a unique genome that defines its appearance, traits, and hereditary lineage. WDG cannot be replicated and cannot be transferred without the user's permission. White Dragon boldly describes itself as being the largest NFT marketplace. It offers a wide range of non-fungible tokens, including art, censorship-resistant domain names, virtual worlds, trading cards, sports, and collectables. White Dragon's item minting tool allows creators to build their own goods on the blockchain. It allows you to create a collection of NFTs without writing a single line of code. You may simply join POLYMON if you're working on a smart contract for a game, a digital collectable, or another project involving unique digital goods on the blockchain.

MISSION

Our mission is to create a decentralized Initial Dex Offering (IDO) method of transacting between different stakeholders of the artwork and related industry. we aim to provide a platform where anybody will have access to the global artwork and related industry market. White Dragon wants to provide real artwork investment opportunities in a compliant manner through the digitization of assets to the whole globe irrespective of any differentiation.

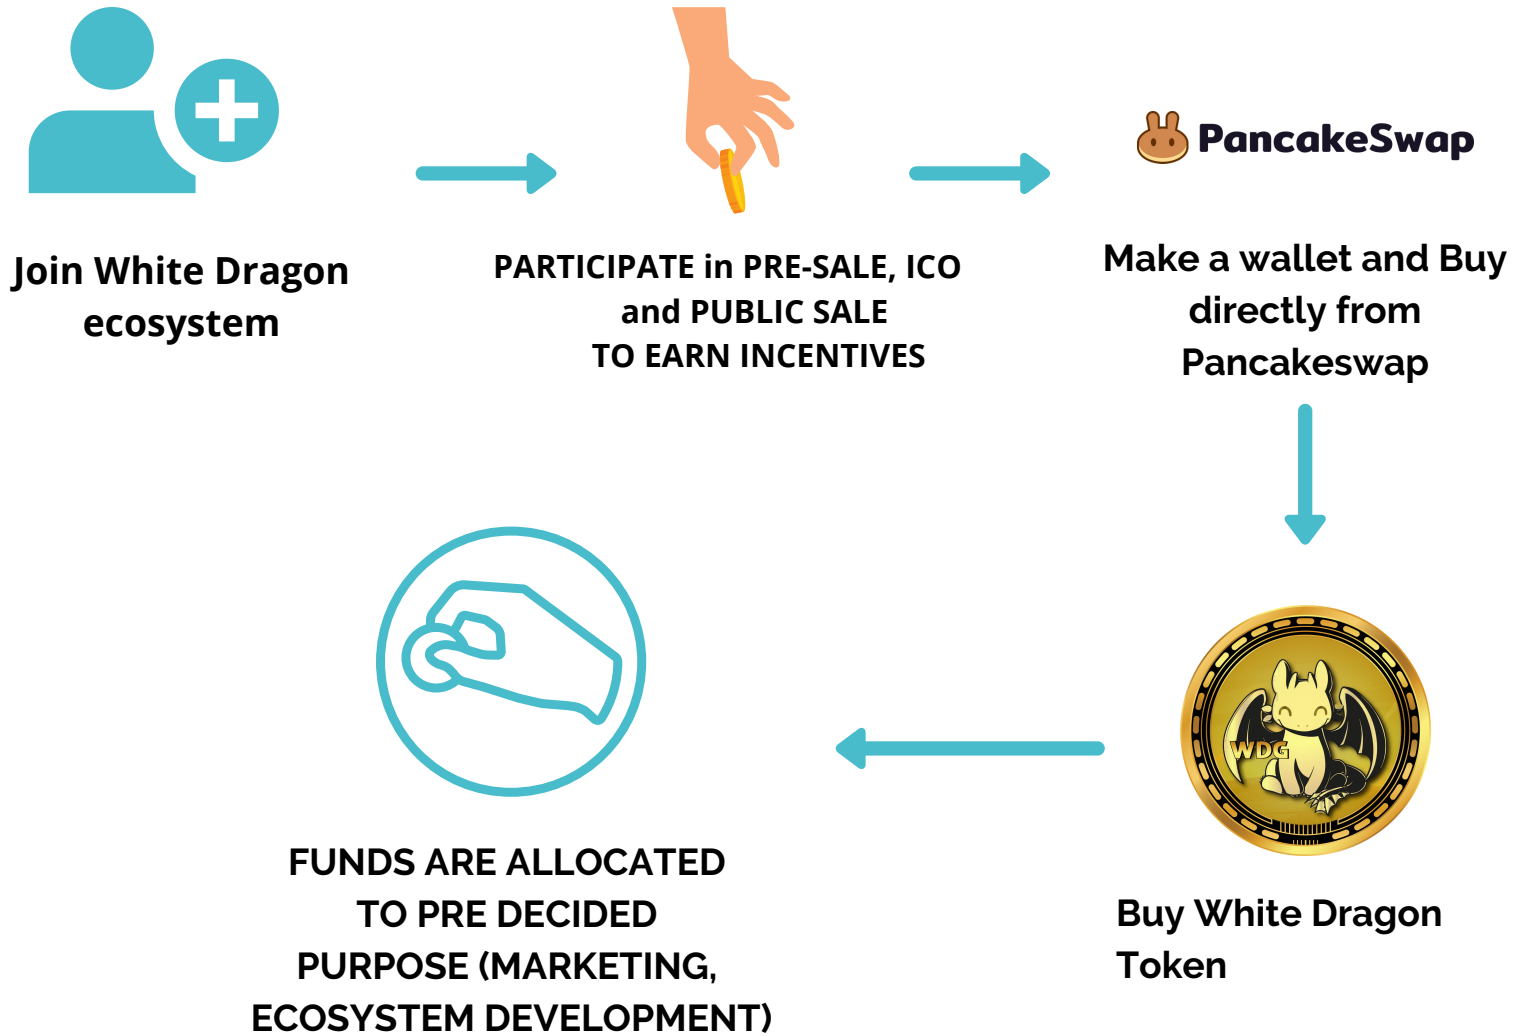

VISION

We envision the conversion of a physical asset into a digital one streamlines processes and removes intermediaries. We reform a world where wealth-building strategies that were once only accessible to affluent individuals become available to everyone, transferring the power over our financial systems back to the people. WDG will build a unique ecosystem to encourage more people to invest in digital assets, allowing them to receive a passive income by relocating/replicating NFTs and keeping them for a long time while keeping their privacy, security, authority, and autonomy. We are working to build an ecosystem that is founded on healthy monetary laws and has a good and robust decentralized basis.

How to buy White Dragon?

Valuables of WDG

1- Limited

The shortage of NFTs adds to their appeal. NFT developers may build an unlimited number of non-fungible tokens, and they often modify the tokens to keep interest up.

2- Indivisible

The majority of NFTs are indestructible into smaller units. You will not be able to purchase a digital item until you pay the full fee.

3- Unique

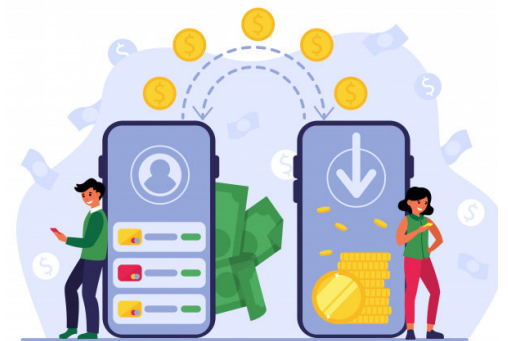

NFT is completely safe and accurate because it has a robust information tab. This feature makes the NFT more unique and potent.

Benefits of WDG as Non-Fungible Token (NFT)

Decentralized exchanges have been transformed by non-fungible tokens. There are some of the advantageous benefits of this cryptocurrency;

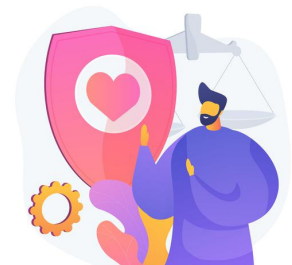

1-Easily Transferable:

The transfers of NFTs are centred on their uniqueness and indivisibility, thus the tokens are sold and purchased on a unique market.

2- Trustworthy:

WDG NFTs are based on blockchain technologies. Consequently, you must be confident that your NFT is right, as counterfeiting a decentralized and permanent record is difficult.

3- Maintain Ownership Rights:

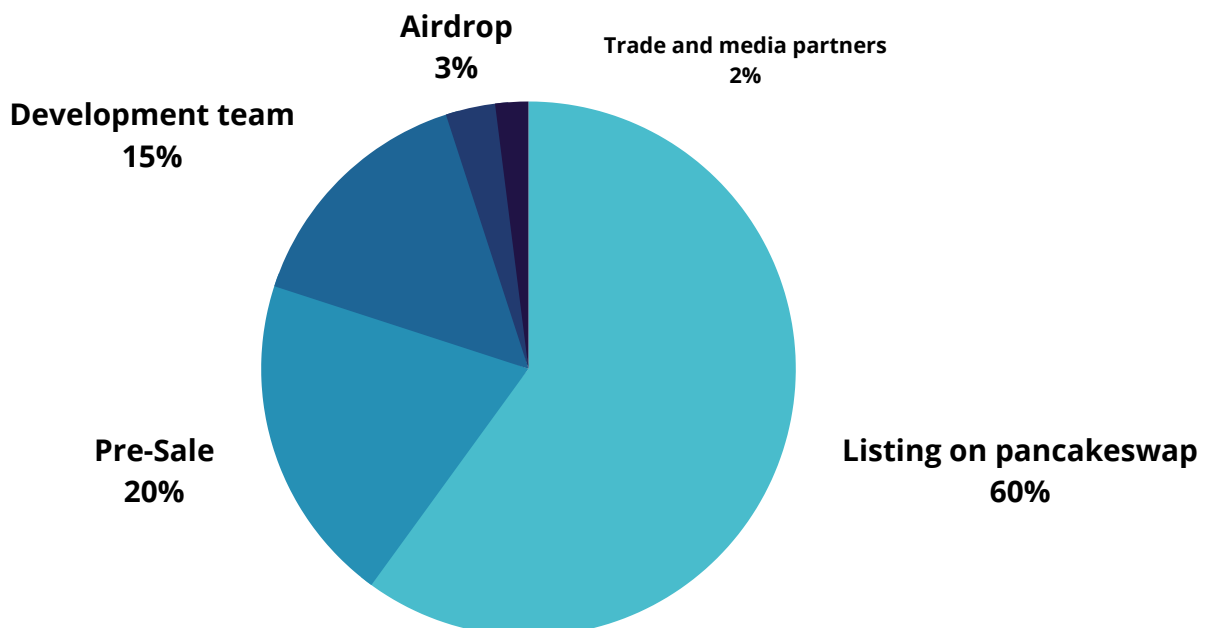

This is a network of open platforms the size of an NFT, with no buyer having the ability to modify the data later.
